Databases: MongoDB, PostgreSQL

PROJECTS

ThaProt-G | *React, NodeJS*

- A college website connecting alumni and students, featuring events, project showcases, and gallery.
- Includes an admin portal for content management.
- GitHub: github.com/Madhav-Mahajan-13/ThaprotG-Pages

C++ Interpreter | *C++*

- A custom interpreter built entirely from scratch with lexer, parser, and AST design.
- Supports variables, function declarations, if-then-else control flow, and local scopes.
- Intended as a hands-on learning tool for compiler/interpreter design.

Chat-Application | *C, Sockets*

- A terminal-based chat application using TCP/IP socket programming in C.
- Supports multiple client-server messaging through basic threading model.
- Provides foundation to explore network programming and concurrent communication.
